

DENTAL GROUP PRACTICE ASSOCIATION OF AMERICA

YOU DON'T HAVE TO LOOK ANY FURTHER TO FINDS THE TRUE CRIMINALS OF THE DENTAL PROFESSION.

<http://www.dgpaonline.org/members.aspx>

NOW THE OWNERSHIP SCANDAL AND MONOPOLY OF HEDGE FUNDS AND PRIVATE CAPITAL GROUPS HAVE GONE LEGITIMATE UNDER THE GUISE OF PUBLIC SERVICE, COMRADESHIP, AND A FAÇADE OF COMPLIANCE. HAS ANYONE EVER QUESTIONED THEIR LEGALITY? SO IF PROVEN THAT THEY ARE ILLEGAL, WHICH OF COURSE THEY ARE BY LAW, THEY ARE IN VIOLATION OF EVERY ACT AND LAW SET FORTH FOR THIS PROFESSION. WE ARE TALKING ABOUT BIG MONEY, BIG LOBBY, AND BIG CORRUPTION. I WILL PROVIDE A 101 BRIEF EXPLANATION AS TO HOW THEY HAVE MILKED THE SYSTEM FOR MORE THAN 2 DECADES.

It is interesting to as to how 30+ organizations that are supposedly at competition in the free markets get to regularly meet, compare notes, and discuss their financial achievements. It is also interesting to as to how 3M this year sponsored all the CEO's of these corporate dental companies for a retreat.

What in the world could these people be talking about? After further looking into these organizations, it becomes evident that each and every one is operating illegally.

You see, a dental office has to be owned (a registered entity) by a dentist in just about every state of the union. So how did these organizations grow to be so big if they are NOT violating the law? The answer is simple: High Corruption, affluent lobby, and let us not underestimate the power of deceit.

To make the pyramid scam simple to understand, the company and/or office that registers with the state has to be owned by a dentist. So how can a hedge fund own a management group and subsequently multi-location offices? It cannot.

They only way to do so, it has to bend the truth and provide an illusion to the regulators, public, and state authorities while paying off or bribing a lot of parties to keep a lid on the truth, while poor children and families suffer at the hands of evil.

The group of crooks help setup a management company for tax, liability, and structural reasons. The next step is to find a couple of greedy dentists (also known as the "PC Holders" that for exchange of a stipend or some sort of a disgusting financial arrangement will allow this group to file the company or multiple offices under their name.

Can the dentists sell the office? NO. Do they have any say? NO. A bunch of crooks with business backgrounds back at the home office are making the decisions and setting quotas.

Now every time the insurance companies and/or the government look in, everything seems compliant, but wait a minute, the rent-a-dentist at times has registered more than 30 offices in his/her name, but he is nowhere to be found or practicing. What is going on here one may ask. The law wants dentists to own, oversee management, and be responsible for their actions.

How can the registered office owner receive a stipend for 30 offices, be on vacation, and/or have allowed unlicensed personal to run the office?

Welcome to one of the largest healthcare scams of our time.

Now that the operations are legitimate in the eyes of the authorities, the management company (mostly of business backgrounds) can lie and claim that it was hired by the registered dentist to run day to day operations, which would be theoretically possible if it was true, but far from it.

The management group, with its syndicates (funding source and shareholders) own all of the assets allocated (in other words hidden) to different entities and run the show. The management group makes ALL DECISIONS, extort funds out of the federal government as well as any insurance company really, bribe certain profiled dentists to be "PC Holders," coerce and utilize cash strapped dentists and dentists with less business acumen to work harder, faster, and be canned if they step out line.

No Bernie Madoff here, but he would perhaps endorse this scam as one of the greatest. Madoff's Ponzi scam looks like chump change to the Pyramid Scam, for the amount of money these criminals have stolen from the American People and our system.

Lots of dead children later, lots of lawsuits in the higher courts, lots of devastated families, lots of grief for the professionals and the profession, but one doesn't seem to be able to get rid of this dental management malignancy that has spread across America at a rapid rate. Well, you cannot buy everything with money.

Our authorities still allow these groups to operate freely in society and unless the professionals wake up and condemn these practices, the evil doers will take and defraud until there is nothing left.
